Proposal 3: Issuance of stock acquisition rights as stock options

This proposal seeks approval for the issuance of stock acquisition rights under preferential terms to Directors, Corporate Officers, and employees of the Company and its consolidated subsidiaries and to delegate the determination of the terms and conditions of the offer thereof to the Board of Directors of the Company pursuant to the provisions of Articles 236, 238 and 239 of the Companies Act as described below.

The issuance of the said stock acquisition rights to Directors of the Company falls under non-monetary compensation to Directors and the amount has not been finalized. The proposal, therefore, seeks approval also for the calculation method for the stock acquisition rights to be allotted as compensation.

The stock acquisition rights as stock options are aimed at enhancing motivation for improving the business performance of the Group and increasing its corporate value as well as boosting morale. The amount of compensation related to stock acquisition rights as stock options for Directors (excluding Outside Directors) shall be determined based on the business performance and the status of execution of duties by them and the level of their contribution, and is the product of the fair value per stock acquisition right on the grant date, as calculated using the Black-Scholes model, and the number of stock acquisition rights allotted.

Considering the above, the Company believes that the amount of compensation related to stock acquisition rights as stock options, its specific contents, and the details of the compensation, etc. to Directors are appropriate.

If Proposal 1 is approved, the number of Directors of the Company eligible for the allotment of the said stock acquisition rights shall be two (excluding the four Outside Directors).

The details of the stock acquisition rights are as follows.

1. The reason why the Company needs to offer the stock acquisition rights under preferential terms

The stock acquisition rights will be issued according to the following guidelines with the aim of offering incentives for improving the business performance of the Group, increasing corporate value, and boosting management awareness with a focus on shareholders.

2. Guidelines for issuance of stock acquisition rights

(1) Persons to whom stock acquisition rights will be granted

Directors, Corporate Officers, and employees of the Company and its consolidated subsidiaries

(2) Class and number of shares to be issued upon exercise of stock acquisition rights

The class of shares to be issued upon exercise of stock acquisition rights shall be the common stock of the Company.

The number of shares to be issued upon exercise of each stock acquisition right (“Number of Granted Shares”) shall be 100 shares.

In the event that the Company splits its common stock (including allotment of its common stock without compensation; the same applies hereinafter) or consolidates its common stock on or after the date of grant of stock acquisition rights (“Grant Date”), the Number of Granted Shares shall be adjusted according to the formula outlined below. Provided, however, that such adjustment shall be made only to those that remain unexercised at the time of such adjustment. Any fraction of less than one share resulting from the adjustment shall be rounded down.

$$\text{Number of Granted Shares after adjustment} = \frac{\text{Number of Granted Shares before adjustment}}{\text{Ratio of stock split or consolidation}} \times$$

Number of Granted Shares after adjustment shall be applied on the following day of the record date of the stock split (if the record date is not stipulated, the effective date) in the case of stock split, and on the effective date or later in the case of stock consolidation.

However, if a stock split is carried out on the condition that a proposal to increase capital or capital reserve by reducing the amount of retained earnings is approved at the Company’s Ordinary General Meeting of Shareholders and a date before the closure of the said Ordinary General Meeting of Shareholders is set as the record date for stock split, the Number of Granted Shares after adjustment shall be applied from the following day of the date on which the said Ordinary General Meeting of Shareholders closes.

Other than the above, in the event the Company carries out a merger, company split, or share exchange, or in other cases, where it becomes necessary to adjust the Number of Granted Shares for the stock acquisition rights after the Grant Date of the stock acquisition rights, the Company may make an adjustment to the Number of Granted Shares approved as necessary by its Board of Directors.

The total number of shares to be issued upon exercise of stock acquisition rights shall not exceed 300,000 shares in common stock.

However, in the event the Number of Granted Shares is adjusted, it shall be adjusted by multiplying the Number of Granted Shares after adjustment by the total number of stock acquisition rights to be issued.

(3) Number of stock acquisition rights to be issued

The number of stock acquisition rights to be issued shall not exceed 3,000 units. The upper limit of the number of stock acquisition rights granted to Directors of the Company shall be 300 units taking into consideration the status of granting of stock acquisition rights as conventional stock options as well as various other factors.

(4) Cash payment for stock acquisition rights

No cash payment is required for stock acquisition rights.

(5) Amount of assets to be contributed upon exercise of stock acquisition rights

The amount to be contributed upon exercise of stock acquisition rights shall be the amount obtained by multiplying the amount to be paid in for each share to be issued upon exercise of such stock acquisition rights (“Exercise Price”) by the Number of Granted Shares upon exercise of such stock acquisition rights.

The Exercise Price shall be an amount obtained by multiplying the average of the closing prices for regular trading of common stock of the Company on the Tokyo Stock Exchange (the “Closing Price”) for each day (excluding days on which there was no trading) of the month preceding the month to which the Grant Date of the stock acquisition rights belongs, by 1.03, with any fraction of less than one yen being rounded up. However, if the amount is lower than the Closing Price on the Grant Date (if there was no trading on that day, the Closing Price on the day immediately preceding), the Closing Price on the Grant Date shall be the Exercise Price. In the event that the Company carries out a stock split or a consolidation of its common stock after the Grant Date, the Exercise Price shall be adjusted according to the following formula. Any fraction of less than one yen shall be rounded up.

$$\text{Exercise Price after adjustment} = \text{Exercise Price before adjustment} \times \frac{1}{\text{Ratio of split or consolidation}}$$

In the event the Company newly issues shares of common stock or disposes of its treasury shares of common stock at a price below the current quotation (excluding the case upon exercise of the stock acquisition rights to issue new shares) after the Grant Date, the Exercise Price shall be adjusted using the following formula with any fraction less than one yen arising from the adjustment rounded up.

$$\text{Exercise Price after adjustment} = \text{Exercise Price before adjustment} \times \frac{\text{Number of shares outstanding} + \frac{\text{Number of shares newly issued} \times \text{Amount to be paid per share}}{\text{Market price}}}{\text{Number of shares outstanding} + \text{Number of shares newly issued}}$$

The “number of shares outstanding” provided in the above formula is derived by deducting the number of treasury shares of common stock of the Company from the total number of issued shares of common stock of the Company. In the event the Company disposes of its treasury shares of common stock, the “number of shares newly issued” shall be read as the “number of treasury shares to be disposed of.”

Other than the above, in the event the Company merges with another company, carries out a corporate split, reduces the amount of capital, or in other cases where it becomes necessary to adjust the Exercise Price for the stock acquisition rights after the Grant Date, the Exercise Price may be adjusted by the Company within the scope deemed reasonable through a resolution of the Board of Directors.

(6) Exercise period of stock acquisition rights

The exercise period shall be a period falling within five years from the day following the day on which two years have elapsed from the Grant Date of the stock acquisition rights.

- (7) Conditions and restrictions for exercise of stock acquisition rights
- (i) The holder of the stock acquisition rights must be a Director, Corporate Officer, or an employee of the Company or its consolidated subsidiaries at the time of the exercise to be eligible.
 - (ii) Inheritance of stock acquisition rights is not permitted.
 - (iii) Other conditions relating to exercise of stock acquisition rights shall be as stipulated in the stock acquisition rights allotment agreement entered into between the Company and the stock acquisition rights holder based on a resolution of the Board of Directors.
- (8) Conditions for acquisition of stock acquisition rights
- (i) If a holder of the stock acquisition rights does not satisfy the conditions for the exercise of stock acquisition rights in abovementioned (7), or is unable to exercise the rights for any other reason, the Company may acquire the stock acquisition rights without charge.
 - (ii) If a proposal for the approval of a merger agreement in which the Company will become the extinct company, a proposal for a share exchange agreement or a share transfer plan in which the Company will become a wholly-owned subsidiary, or a proposal for the approval of a split agreement or a split plan in which the Company will become a split company is approved at the Ordinary General Meeting of Shareholders, the Company may acquire stock acquisition rights without charge on a date separately stipulated by the Board of Directors.
- (9) Restriction on the acquisition of stock acquisition rights by transfer
- Any acquisition of stock acquisition rights by transfer shall require an approval of the Board of Directors of the Company by its resolution.
- (10) Matters related to amount of capital and capital reserve increased by the issuance of shares upon exercise of stock acquisition rights
- (i) The amount of capital increased by the issuance of shares upon exercise of stock acquisition rights shall be one-half of the amount of the maximum limit on the increase in capital as calculated pursuant to Article 17, paragraph (1) of the Regulations on Corporate Accounting. Any fraction of less than one yen shall be rounded up.
 - (ii) The amount of capital reserve increased by the issuance of shares upon exercise of stock acquisition rights shall be the amount of the maximum limit on the abovementioned increase in capital provided, reduced by the amount of increased capital stipulated above.
- (11) Handling of fractions
- If there is a fraction of less than one share in the number of shares to be issued to the stock acquisition right holder who exercised the stock acquisition right, such fraction shall be rounded down.
- (12) Specific method for calculating compensation to Directors, and criteria for calculating fair value of stock acquisition rights
- The specific calculation method for compensation to Directors shall be the fair value per stock acquisition right multiplied by the total number of stock acquisition rights allotted to the Company's Directors (excluding Outside Directors) in office on the Grant Date of stock acquisition rights.
- The fair value of a stock acquisition right shall be based on a fair valuation calculated using the Black-Scholes model on the basis of the Company's stock price, Exercise Price and various other conditions on the Grant Date.
- (13) Other details regarding the issuance of stock acquisition rights shall be determined through a resolution of the Board of Directors meeting to be held at a later date.
